INT. EXAMPLE LOCATION - NIGHT

This text is meant to help the model understand the exact formatting rules for the app development. I will continue to right so you can keep seeing more examples of how this formatting functions in the industry-standard.

This is just another example, so you can see what line spacing looks like.

That is also vital for the formatting of our app because we need it to be just as reliable as an app like Final Draft.

                    CHARACTER ONE
          Please pay close attention to the
          margins and make sure that yours
          are exactly as mine are.

                    OTHER
          Again, this screenplay formatting
          is very specific; make sure you
          don't miss a thing.

And now I will do gibberish.
